

Essential Mathematics 20S

Credit Value: 1.0

Course Description:

The Grade 10 Essential mathematics course is designed for students who do not intend to focus on math or science related fields as part of their post secondary program. There is a strong emphasis on practical math skills.

The topics of study are broken into the following units:

- Analysis of Games and Numbers
- Personal Finance
- Trigonometry
- Measurement
- Consumer decisions
- 2-D Geometry
- Transformations
- Angle Construction
