

# Science 20F

Credit Value: 1.0

---

Pre-requisite: Science 10F

Course Description:

Science 20F introduces students to four of the natural sciences – Chemistry, Physics, Meteorology and Ecology and is designed to help student select which field(s) they will study in Grade 11 and 12. Through classroom studies and discussions, experimentation, demonstrations, activities, project work and assignments student learn to connect and the real world.

Science 20F is broken down into four clusters:

1. Dynamics of Ecosystems
2. Chemistry in Action
3. In Motion
4. Weather Dynamics
